CAPABILITIES STATEMENT

ALPFR

"We are experts in all things Cloud"

COMPANY OVERVIEW

ALPFR Solutions, LLC is an advanced technology consulting firm specializing in Generative AI and Multi-Cloud Solutions. With over 18 years of experience, we design and implement secure, mission-critical systems for federal and enterprise clients. Our team bridges cutting-edge AI innovation with robust multi-cloud architectures across AWS, Azure, GCP, and OCI, delivering scalable, data-driven solutions. We architect petabyte-scale data platforms and deploy Generative AI systems - including Retrieval-Augmented Generation (RAG) and AI Agents - to help government organizations solve their most complex technical challenges.

CORE COMPENTENCIES

Generative AI & AI Engineering

- **Retrieval-Augmented Generation (RAG)**: Architect and deploy enterprise-grade RAG solutions using LangChain and vector databases (PostgreSQL/pgvector) to query and summarize large-scale technical manuals and compliance documentation.
- **AI Agent Development:** Design and implement autonomous AI agents (LangChain) to automate security log analysis, threat detection, and operational optimization.
- **GenAI Data Pipelines:** Engineer scalable data pipelines (Python, SQL, Airflow, Spark) for processing terabyte-scale unstructured text supporting advanced recommendation and decision models.
- **AI/ML Platforms:** Expertise across AWS SageMaker, Google AI Platform, Azure ML, and cloud-native chatbot/conversational AI services (AWS, Azure, GCP).

Multi-Cloud Architecture & Data Engineering

- **Cloud Architecture:** Design secure, compliant multi-cloud architectures (AWS, Azure, GCP) supporting DoD and federal missions.
- **Cloud Migration:** Lead discovery, design, and migration of 50+ legacy applications to modern microservices architectures.
- **Big Data Platforms:** Architect enterprise data solutions (Spark, Kafka, EMR, BigQuery, Redshift) processing over 12 petabytes of data.
- **Event-Driven Architecture:** Build and manage event-streaming ecosystems (Azure Event Hubs, Kafka, Kinesis) handling 750M+ daily events.

DevSecOps & Automation

- **Container Orchestration:** Deploy and manage 15+ Kubernetes/OpenShift clusters (EKS, GKE, AKS) for high-availability workloads.
- **Infrastructure as Code (IaC):** Automate cloud infrastructure and network provisioning (Terraform, ARM templates), reducing deployment time by 75%.
- **System Analytics:** Implement comprehensive monitoring and observability stacks (Azure Monitor, Splunk, Prometheus) cutting incident response times (MTTR) by 40%.

DIFFERENTIATORS

- **18+ Years of Proven Federal & Enterprise Experience**: Deep, hands-on experience architecting solutions that meet complex federal security standards (DoD).
- **Architect-Level AI Expertise:** Unique ability to not only design AI models but to architect the underlying cloud-native, petabyte-scale data infrastructure required to support them.
- **Multi-Cloud & Vendor-Agnostic:** Certified expert across all three major cloud providers (AWS, Azure, GCP), ensuring best-fit, cost-effective solutions.
- **Rapid Deployment & Automation:** Proven record of reducing deployment times (75%) and improving deployment frequency (300%) through mature DevOps and IaC practices.

PAST PERFORMANCE

- **Generative AI Architect (Federal/Enterprise):** Architected and deployed an enterprise RAG system (LangChain, pgvector) to query DoD compliance documents and technical manuals, improving search accuracy and providing context-aware answers.
- **AI Agent Developer (Federal/Enterprise):** Designed an autonomous AI agent (LangChain) for automated daily security log analysis, proactively identifying and summarizing potential threats.
- **Accenture Federal Services:** Provided Cloud Architectural Design for the deployment of compliant DoD applications.
- **Financial Industry Regulatory Authority (FINRA):** Architected a real-time fraud detection and market integrity platform using Big Data technologies (Spark, Kafka).
- **University of Maryland University College:** Led the implementation of a large-scale Data Center Migration to the AWS Cloud.

LICENSES / CERTIFICATIONS

- Minority-Owned Business
- Women-Owned Small Business (WOSB)
- Joint Venture eligible under the WOSB Program
- Economically Disadvantaged Women-Owned Small Business
- CISSP: Certified
- Small Business

CISSP Certified Information Systems Security Professional ISC2 Certification
