Capability Statement

About Us

ALPHR Solutions is an IT services provider firm, founded by a team of IT professionals with decades of proven IT expertise. We are a fast growing end-to-end IT services company, serving multiple private and public sector clients. Our customer base includes commercial, federal, state and local governments. We provide project-based work in IT engineering, Infrastructure deployment, assessment & Analysis, and application development.

ALPHR Solutions provides cost-effective, state-of-the-art services, solutions and talent pool to our commercial and government clients. Our services and resources are targeted at developing complex IT applications, providing end-to-end implementations, upgrade and support services and also government and commercial procurements.

Consequent to our dedicated focus on quality and customer service, we have an extremely high customer retention rate. We offer a flexible suite of staffing services, including direct hires; temporary contingent engagements and fixed-price contracts.
